How will Moab act if I add and over subscribe nodes over my license moab.lic limitations

I had a site recently try this and claimed it caused major problems because Moab would try to start jobs there. I tested against this here is what I found. (Version: moab server 8.1.2)

This looks like a non-issue unless you purposely try to tie jobs to the non-licensed nodes. Either the customer was mistaken in what he was seeing OR we was not accurately assessing the information. What I think he might have been doing is he placed all his new nodes in a specific class and then submitted to that class so I tested that as well and the jobs automatically cancel once they were considered for the priority reservation.

[nburton@ibm08 ~]\$ mdiag -n

compute node summary

Name State Procs Memory Opsys

ibm10.ac Busy 0:40 7823:7823 linux

ibm11.ac Busy 0:40 7823:7823 linux

<u>ibm13.ac</u> --- 0:0 0:0 linux

<u>ibm14.ac</u> --- 0:0 0:0 linux

----- 0:80 15646:15646 -----

Total Nodes: 4 (Active: 2 Idle: 0 Down: 2)

(ibm13.ax and ibm14.ac are the nodes in violation of license limits)
