

Moab

What does the % column in mdiag -f stand for?

Issue:

What does the % column in mdiag -f stand for?

Symptom:

```
mdiag -f
FairShare Information
Depth: 6 intervals Interval Length: 00:20:00 Decay Rate: 0.50
FS Policy: DEDICATEDPES
System FS Settings: Target Usage: 0.00
FSInterval % Target 0 1 2 3 4 5
FSWeight ----- 1.0000 0.5000 0.2500 0.1250 0.0625 0.0312
TotalUsage 100.00 ----- 85.3 476.1 478.9 478.5 475.5 482.8
USER
-----
test1 2.51 ----- 2.20 2.69 2.21 2.65 2.65 3.01
test2 12.82 ----- 12.66 15.36 10.96 8.74 8.15 13.85
test3 3.44 ----- 3.93 2.78 4.36 3.11 3.94 4.25
test4 4.94 ----- 4.44 5.12 5.52 3.95 4.66 4.76
```

Solution:

The % means the column is in percents.

2.51%

12.82%

etc..

/* time interval covered by each FS data file */

So add up the 2.51+12.82+3.44+4.94 etc.. for the credentials and it should be close to 100.00.
