

Moab

Showstats showing initialized in 1969

Issue: Showstats showing initialized in 1969 or other date.

Solution:

To fix the date that showstates is displaying you will need to shutdown Moab and backup the .moab.ck and .moab.ck.1 file in your \$MOABHOMEDIR.

Next edit the .moab.ck file

The entry is towards the end of the checkpoint file on a line that looks like this:

```
SYSSTATS SYSSTATS 1452094070 0.000 0.000 1452094056 0 0 1317.400000  
0.000000 0.000000 0.000000 0.000000 0 0 0.000000 0 0 0.000000 0.0000
```

The timestamp you want to change is the 6th field ("1452094056" in the example above). The timestamp should be entered around the time your cluster started to report. For example I deployed my cluster on Jan 1 2010. Using the link below I get "1262368650".

<http://www.epochconverter.com/>

Now insert and start Moab.

```
SYSSTATS SYSSTATS 1452094070 0.000 0.000 1262368650 0 0 1317.400000  
0.000000 0.000000 0.000000 0.000000 0 0 0.000000 0 0 0.000000 0.0000
```

Note that your stats should now show initialized in 2010.
