

Torque

moab: error while loading shared libraries: libtorque.so.2

Issue: moab: error while loading shared libraries: libtorque.so.2

Affected Versions: All

Symptom:

When starting moab you receive the following error:
moab: error while loading shared libraries: libtorque.so.2: cannot open shared object file: No such file or directory

Solution:

Add a library include statement that points to the installed libraries for TORQUE. Here is an example for both Moab and TORQUE.

```
echo '/opt/moab/lib' > /etc/ld.so.conf.d/moab.conf  
echo '/usr/local/lib' > /etc/ld.so.conf.d/torque.conf  
ldconfig
```

Unique solution ID: #1030
