

Moab

Automated Installer Error: pyparsing RPM Not Found

Problem:

The Automated Installer may fail because pyparsing-2.0.3-1.el7.noarch.rpm cannot be found.

Error:

```
TASK [viewpoint_server : Add workaround for https://bugs.centos.org/view.php?id=12722] *****
fatal: [insight-perf07.ac]: FAILED! => {"changed": false, "failed": true, "msg": "Failure downloading http://mirror.centos.org/centos/7/cloud/x86_64/openstack-newton/common/pyparsing-2.0.3-1.el7.noarch.rpm, HTTP Error 404: Not Found"}
to retry, use: --limit @/root/moab-hpc-suite-9.1.1.1-el7/automated-installer/playbooks/full-suite.retry
```

Solution:

1. Navigate to the automated_installer directory in the directory where the unpacked moab-hpc-suite distribution is located.

```
[root]# cd ~/moab-hpc-suite-9.1.1.1-el7/automated_installer
```

2. Edit playbooks/roles/viewpoint_server/tasks/main.yml.

```
[root]# vi playbooks/roles/viewpoint_server/tasks/main.yml
```

3. Replace the following line:

Moab

name: `http://mirror.centos.org/centos/7/cloud/x86_64/openstack-newton/common/pyparsing-2.0.3-1.el7.noarch.rpm`

with this line:

name: `http://vault.centos.org/centos/7.3.1611/cloud/x86_64/openstack-newton/common/pyparsing-2.0.3-1.el7.noarch.rpm`

4. Re-run the Automated Installer.
