# What does the % column in mdiag -f stand for?

**Issue:**

What does the % column in mdiag -f stand for?

**Symptom:**

mdiag -f
FairShare Information
Depth: 6 intervals Interval Length: 00:20:00 Decay Rate: 0.50
FS Policy: DEDICATEDPES
System FS Settings: Target Usage: 0.00
FSInterval **%** Target 0 1 2 3 4 5
FSWeight ------- ------- 1.0000 0.5000 0.2500 0.1250 0.0625 0.0312
TotalUsage 100.00 ------- 85.3 476.1 478.9 478.5 475.5 482.8
USER
---
test1 2.51 ------- 2.20 2.69 2.21 2.65 2.65 3.01
test2 12.82 ------- 12.66 15.36 10.96 8.74 8.15 13.85
test3 3.44 ------- 3.93 2.78 4.36 3.11 3.94 4.25
test4 4.94 ------- 4.44 5.12 5.52 3.95 4.66 4.76

**Solution:**

The % means the column is in percents.
2.51%
12.82%
etc..

/* time interval covered by each FS data file */
So add up the 2.51+12.82+3.44+4.94 etc.. for the credentials and it should be close to 100.00.

Unique solution ID: #1057
