

Torque

Why does TORQUE send the mom hierarchy to down nodes?

Issue: Why does TORQUE send the mom hierarchy to down nodes?

I have 6 node (out of 590) that are marked down and/or offline.

I have 5000+ messages in my server logs complaining that it couldn't connect and/or send the mom hierarchy to these nodes.

Shouldn't the server be intelligent enough to realize that these nodes (especially the ones marked "down") aren't available for such communication?

Solution:

This has been fixed. Please upgrade to 5.1.3, 6.0.2.

Unique solution ID: #1130
