

# Viewpoint

## default\_resources.nodes setting and "msub -l procs" requests

**Issue:** When migrating jobs to Torque from Viewpoint, Moab will translate the request into the equivalent qsub command with the proper -l procs syntax.

In some situations, Torque's queues may have been configured with a default\_resources.nodes setting that is incompatible with the job's -l procs request. In this situation, the default\_resources.nodes setting should be removed from the queue or the job should be submitted to a queue that does not have a default\_resources.nodes setting.

**Affected Versions:** 9.1
